

Coquitlam — Burquitlam Station

Site context plan for completed Burquitlam Station

Construction of Burquitlam Station is scheduled to begin in early 2014. To prepare for station construction, several early works activities began in spring 2013 and will continue into the summer. These activities include demolitions, installation of fencing around work zones, utility relocations, relocation of pedestrian walkways and road works.

Column foundation and elevated guideway construction at Burquitlam Station began in the spring of 2013. Foundation and guideway construction will then move

south from the station area on Clarke Road and down North Road to Lougheed Town Centre Station in Burnaby.

When construction is complete, Burquitlam Station will have passenger pickup and drop-off spaces adjacent to the station, as well as a dedicated spot for a HandyDART service in front of the station. For the convenience of cyclists, there will be bike racks and bike lockers next to the station.

A new traffic signal north of the station area will allow pedestrians and cars to move easily in and out of Burquitlam Plaza area.

BURQUITLAM STATION

Burquitlam Station is a central focus of Coquitlam's vision of a transit-oriented village for the area. The station is adjacent to Burquitlam Plaza on the east side of Clarke Road between Smith and Como Lake avenues, and will serve the 6,000 residents of the area, as well as new residents as the area redevelops.

Burquitlam Station is designed to complement and support the transit-oriented character envisioned for the area. The station will be bright and open with high ceilings. The use of glass at the station entrance and for elevators will create a safe environment, as passengers will be visible.

The open, pedestrian-friendly sidewalks and station entry area will allow easy connection for those walking to access the station or transferring to and from on-street bus bays on Clarke Road. Burquitlam Station will also serve as a major connection point for buses travelling to and from Simon Fraser University.

WHAT IS THE EVERGREEN LINE?

The Evergreen Line is a new rapid transit line that will connect Coquitlam to Vancouver via Port Moody and Burnaby. The Evergreen Line will be a fast, frequent and convenient SkyTrain service, connecting Coquitlam City Centre to Lougheed Town Centre in approximately 15 minutes. The Evergreen Line will connect without transfer to the Millennium Line and the current SkyTrain network at Lougheed Town Centre Station and will integrate with the regional bus and West Coast Express network. The Evergreen Line will in service by summer 2016.

TRAFFIC INFORMATION

Every effort will be made to minimize disruption and maintain access during construction of the Evergreen Line for both businesses and residents. If you have questions or concerns, please call:
